Jamo A 320

The A 320 satellites are a small, almost invisible speaker with good sound quality. The size and design makes it a perfect match for the many new flatscreens on the market.

Despite the small size of the satellite speaker, it features a two-way system – a woofer and a tweeter - that reproduces the mid- and upper range frequencies with full fidelity. The result is a very natural sounding vocal quality.

Because of their rounded profile, the A 320 speakers can be placed almost anywhere; horizontally or vertically on a bookshelf, on a wall, in a corner – the only limit is your imagination. Thanks to the ingenious fittings, the speakers can be aimed towards the listening position. Accessories for different placement options are included with the speakers.

Specifications
